mastervac

Main Features

- ❑ The Interchangeable collection unit has been designed to fit all of master's vacuums with a standard 100 lt collection bin.
- ❑ It's now fast and easy to transform your standard vacuum into a Longopac equipped vacuum cleaner.

Main Features

Interchangeable longopac
safe collection system

The structure of the interchangeable longopac system allows the user to rapidly change one collection system with the standard 100 lt bin.

Main Features

While the vacuum is on the flap it stays closed.

When the vacuuming stops the weight of the material opens up the flap and it deposits in the Longopac bag below.

Main Features

While the bag fills up the weight of the material makes it deposit on the bottom of the structure.

Once the bag is full the user simply has to close, cut and dispose safely of it. Pulling and closing the bottom of the bag to then start again the vacuum.
