

Case history

TS 750 cleaning up
oil tanker shipyard

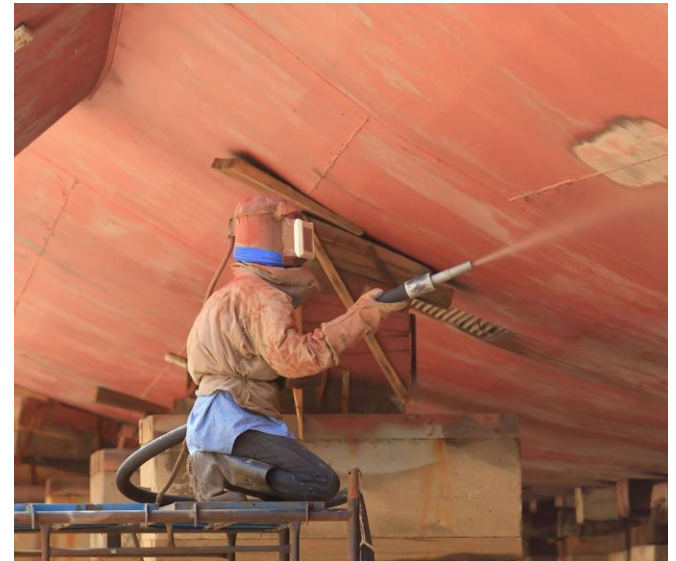

mastervac

The Customer

The Customer was a leading, Thailand based, shipbuilding company with a track record well recognized among ship owners in Government and private sectors both local and international.

☑ Requirements

- ☐ Cleaning of ships and shipyard throughout the building process
- ☐ Picking up of fine and heavy dust from lower decks
- ☐ Recovery of high quantities of very heavy blasting sand

The solution

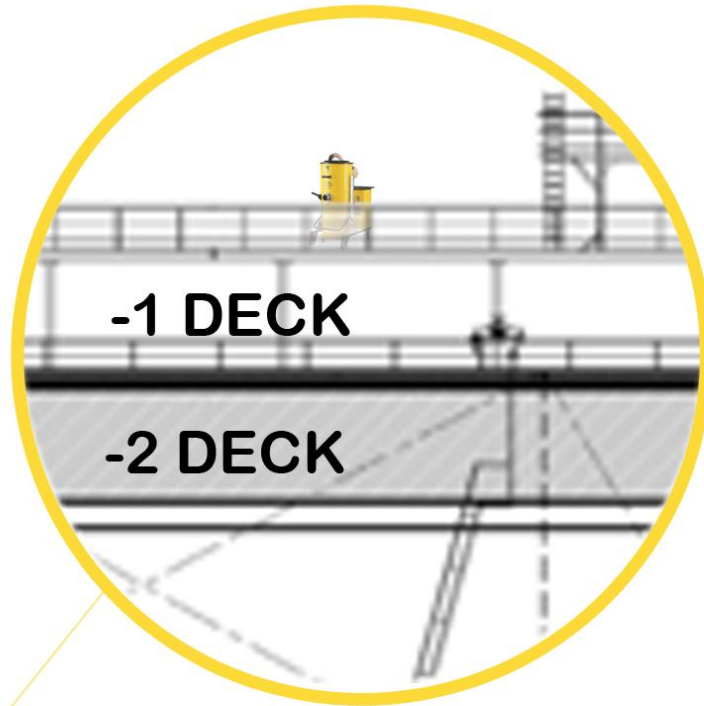

Mastervac's distributor, after a evaluation of the needs of the customer organized a demonstration with a TS 750 industrial vac.

TS 750

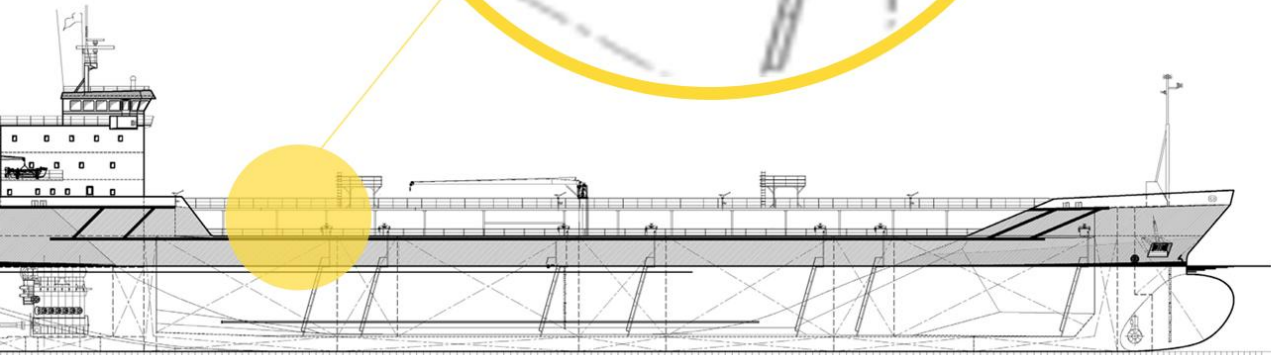

- ❑ very powerful 5.5 kw side channel blower
- ❑ 100 lt capacity, detachable container for fast emptying
- ❑ Extremely tough chassis, suitable for heavy duty applications even 24/7

The solution

The vacuum placed on the upper deck had to pick up high quantities of heavy dust from -1 and -2 lower decks.
